(54) MAGNETIC WRITING AND READING DEVICE

(57)Abstract:

PURPOSE: To obtain a device capable of inputting control information to a computer directly by sticking a magnetic tape on a product, moving the product at a constant speed and writing information, and further moving the product at the constant speed and reading the information.

CONSTITUTION: A magnetic tape cut to a fixed length is stuck on the product by a tape sticking device and fixed information on the name of the product is written by a magnetic head in a stage A. Magnetic heads are all connected to a computer system. The product is worked, assembled, and tested in stages B1W Bn and pieces of dynamic control information on a lot number, machine number, date of manufacture, delivery data, test result, etc., from memories provided to a keyboard and respective stages are written. All pieces of information are read in a stage C and the magnetic tape is removed from the product when necessary. Thus, the progress state of each stage is inputted to a computer system momentarily to display the progress of every stage and totalize and print out process control data.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
